

## WHO WE ARE

With over twenty combined years of insurance related restoration experience, All Pro Restoration is uniquely experienced for any type of loss you have suffered. All Pro Restoration has the quality personnel for your project and will deliver the personal and professional commitment and services that you need and expect. Building over 300 homes, ranging from 1,200 to 8,500 square feet, our vast experience in building design and fire restoration has resulted in superior results, producing tangible value based projects!

Disaster restoration is a highly specialized field that requires professional attention to detail. In the event of fire, water, storm, or natural disaster repairs are needed, the owners, Sean Kaider and William McCleve, personally oversee all projects and repairs working directly with clients to ensure their vision becomes reality!

“All Pro Restoration, a results-oriented company skilled in all areas of fire restoration, new build construction and design. Superior results, producing tangible value based projects!”

## WHAT WE DO

### FIRE

Few events parallel the trauma caused by fire. Fire/smoke damage requires more service and expertise than an ordinary contractor can provide. To adequately restore your home to pre-loss condition, requires a skill set in the many methods of construction, design and management. Additionally, a thorough comprehension regarding your insurance policy and how it applies to the reconstruction process. Working directly for you, All Pro Restoration will work with your insurance company to streamline the tedious claims process and navigate the many challenges a major property claim produces.

- Structural repair and complete rebuilds
- Smoke damage cleanup/restoration
- Emergency board up
- Tarp-up services
- Debris Removal
- Emergency-Temporary Power
- Temporary Fencing
- Asbestos Remediation
- Drafting design

- Drying equipment
- Structural Cleaning
- Pack out and Pack back of personal property
- Odor Removal
- Emergency-Temporary Power
- Comprehensive building estimate

### WATER DAMAGE & REPAIR

Water damage is one of the most common home and property emergencies. Various water hazards within the structure cause extensive damage to soft goods and structural elements. If left unattended, standing water can cause dangerous buildup of fungus and other hazardous microbes.

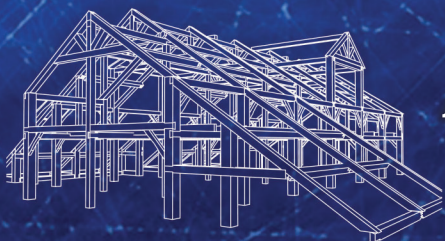

### WATER DAMAGE & EXTRACTION

Quick response time and mitigation of subsequent water damage is crucial in the repair process. All Pro Restoration's skilled technicians are prepared to help you make important decisions as you recover from your emergency, including helping you work through the maze of the insurance claims process.

### ASBESTOS ABATEMENT

supervising your asbestos removal project, we provide you with end-to-end solutions. All site supervisors and workers are certified and trained according to state and federal standards. We meet or exceed all OSHA regulations for worker protection & safety. We use full polyurethane plastic containments and HEPA filtered negative air pressure & vacuum machines to prevent asbestos exposure outside of our scope of work.
